Write – Up: Webinar on “Awareness Program for Planting Trees”

DATE: - 9th Oct, 2021 (Saturday) at 10.30 am.

The webinar on “Awareness Program for Planting Trees” was conducted by Dr. Sunil Dhanawade, Director, DYPCMR, Pune. It was conducted on Zoom platform. 208 number of participants attended the webinar.

The points covered were:

Importance of Tree Plantation:

Planting trees is the ideal approach to support nature. It additionally helps other living species, including people, in many ways. Trees give us oxygen, food, shelter, and many more. They are natural air filters and noise safeguards. Trees are the earth's life supportive network. They support and are essential for life on earth. Aside from giving oxygen, trees additionally work as common safeguards of noise pollution. The forests do develop naturally. Be that as it may, today, forests are chopped down at a rate more noteworthy than they could develop. This causes a sort of irregularity, wherein relatively few trees are left to meet our oxygen supply and different requirements.

Benefits of Tree plantation in Social Terms:

- Trees make life nicer. It has been shown that spending time among trees & green spaces reduces the amount of stress that we carry around with us in our daily lives.
- Hospital patients have been shown to recover from surgery more quickly when their hospital room offered a view of trees.
- Children have been shown to retain more of the information taught in schools if they spend some of their time outdoors in green spaces.
- Trees are often planted as living memorials or reminders of loved ones or to commemorate significant events in our lives.

Benefits of Tree plantation in Communal Benefits:

- Even though you may own the trees on your property your neighbors may benefit from them as well.
- Through careful planning trees can be an asset to your entire community.
- Trees can be placed to screen unwanted views or noise from busy highways.

- Trees can complement the architecture or design of buildings or entire neighborhoods.

Benefits of Tree plantation in Environment:

- Trees offer many environmental benefits.
- Trees reduce the urban heat island effect through evaporative cooling and reducing the amount of sunlight that reaches parking lots and buildings. This is especially true in areas with large impervious surfaces, such as parking lots of stores and industrial complexes.
- Trees improve our air quality by filtering harmful dust and pollutants such as ozone, carbon monoxide, and sulfur dioxide from the air we breathe.
- Trees give off oxygen that we need to breathe.
- Trees reduce the amount of storm water runoff, which reduces erosion and pollution in our waterways and may reduce the effects of flooding.
- Many species of wildlife depend on trees for habitat. Trees provide food, protection, and homes for many birds and mammals.

Benefits of Tree plantation in Economic Benefits:

- Well placed trees can reduce your cooling costs in the summer by shading the south and west sides of your home. If deciduous trees are used they will allow the sun to pass through and warm your home in the winter.
- Evergreen trees on the north side of your home and shrubs around the foundation of your home can act as a windbreak to reduce the cooling effects of winter winds.
- The value of a well landscaped home with mature healthy trees can be as much as 10% higher than a similar home with no or little landscaping. (Topping will reduce the value of your trees)
- Some indirect economic benefits of trees are that if we reduce the energy we use then utility companies will have less demand placed on the infrastructure, thus reducing operating costs which can be passed on to the consumer.

Write-up on “Impact of E-waste on Environment and health” session

Venue: DYPCMR Auditorium

Date: 5th April, 2022

Number of participants: 75

A session was organized, on “**Impact of E-waste on Environment and health**” by S.M.Dr.D.Y.Patil Centre for Management and Research Chikhali Pune.

Director of the institute Dr.Sunil Dhanawade sir in his welcome address highlighted the importance of arranging the session .

The resource person of the Session Prop. Mr. Vivek Jidewar Winstep Enterprises expressed the importance of E-waste management and impact of E-waste on Environment and health.

Sir brought to audience attention the different toxins and its sources

Toxics in E-waste

Over 1000 materials, many toxic

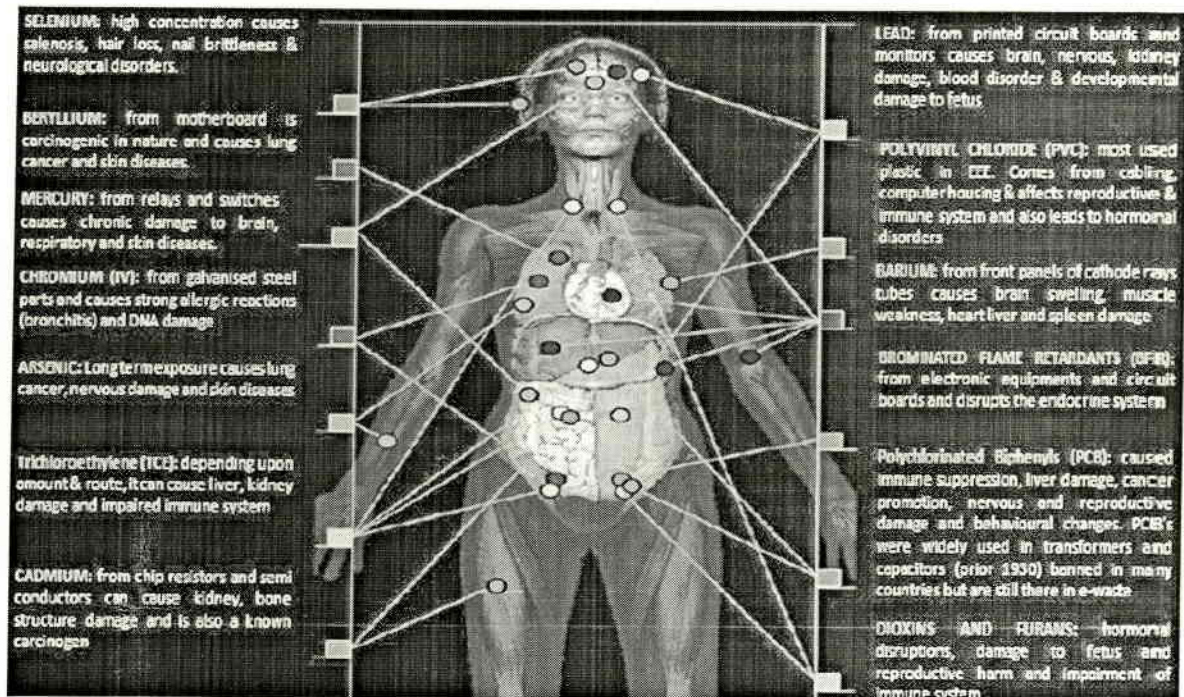

- Lead and cadmium in circuit boards;
- Lead oxide & cadmium in monitor cathode ray tubes (CRTs);
- Mercury in switches and flat screen monitors
- Cadmium in computer batteries;
- Polychlorinated biphenyls (PCBs) in older capacitors and transformers;
- Brominated Flame Retardants (BFR) on printed circuit boards, plastic casings, cables
- Polyvinyl chloride (PVC) cable insulation – release highly toxic dioxins and furans when burned

Environment Impacts

- Emissions of dioxins/ heavy metals – lead, cadmium, mercury
- Other contaminants like BFRs
- Spent fluids/chemicals in soil
- Groundwater contamination
- Non-recyclables- Landfilling and leachate
- Beyond workplace street dusts showed traces of PCBs

Health Impacts
